## Infectious Diseases & Immunity Seminar Series  
**Sponsored by the Infectious Diseases & Immunity Graduate Group**  
microbe.berkeley.edu/idgroup

**MONDAYS 2–3 PM  125 LI KA SHING**

<table>
<thead>
<tr>
<th>Date</th>
<th>Speaker</th>
<th>Topic</th>
</tr>
</thead>
</table>
| **FEB 25** | **Dara Burdette, PhD**  
Vance lab | Cytosolic sensing of cyclic dinucleotides by STING |
| **MAR 4**   | **Mark Grabiner**  
Machen lab | A bacterial quorum sensing molecule and its inflammatory double-edged sword |
| **MAR 11**  | **Michelle Reniere, PhD**  
Portnoy lab | Glutathione is required for virulence of *Listeria monocytogenes* |
| **MAR 18**  | **Steve Francis**  
Buffler lab | Applications of Metagenomic Epidemiology: From social networks to childhood leukemia |
| **APR 1**   | **John Boothroyd, PhD**  
Professor  
Stanford University | How and why do different strains of *Toxoplasma* manipulate the host cell in such radically different ways? |
| **APR 8**   | **Liana Chan * **  
Chambers lab | Finishing Talk: Novel mechanisms of beta-lactam antibiotic resistance in *Staphylococcus aureus* |
| **APR 15**  | **Fenyong Liu, PhD** | Regulation of human cytomegalovirus DNA genome replication by human proteins |
| **APR 22**  | **Poornima Parameswaran**  
Harris lab | Coincident immunome signatures in human dengue |
| **APR 29**  | **Karen Ottemann, PhD**  
Professor  
UC Santa Cruz | Chemotaxis and *Helicobacter pylori* infections |
